Description

Wedding hairstyles and makeup!

Found these on Google and Pinterest. I really love this sweet look! Definitely nothing too overboard for me â?? N always says he prefers me without makeup too, haha.

Sidetrack: I ordered a Cinderella MacBook decal sticker last week and it finally arrived! Look at how pretty it is! Will be passing my friend to play music from my laptop during the wedding and I really love how this fits in with the whole magical theme.

Happy sigh. I love Cinderella because my story mimics her life in so many ways. Hopefully I'll get her happily-ever-after too!

Bridal hairstyles â?? I'm really loving all the braids and flowers-in-hair concept!

This is my favourite so far.

I love how romantic and young this look is.

While this just shouts glamourous!

But considering how I really want an off-shoulder gown, this look might be better as well? I really love having my hair in a bun anyway, and this looks so whimsical while elegantly classic. I don't want my hair to stick to my skin if I perspire (and SG is so hot!) but I'm divided as to whether I should keep it up or downâ?¦

Will definitely have to dye my hair a lighter brown before the wedding. This will be my virgin experience in bleaching my hair!

Or should I go for a shade even lighter, like this one? Not sure if my tanned skin would pull it off thoughâ?¦

#dayrebrides how did you girls decide on your look when you got married? Any tips for a newbie like me?
