What does the Trade War mean for your portfolio?

Description

Join us tomorrow (online) as we discuss the implications of the US-China trade war and its implications on the stock market.

default watermark

In this webinar, we will look into **what happened historically when trade tariffs were imposed** on such a global scale, and discuss **what could happen for the markets** if history ends up repeating itself.

Even if it doesnâ??t, weâ??ll discuss **what the trade war may mean for your portfolio** and the **strategies you might want to adopt to â??weatherproofâ?• your investments**.

For the opportunistic, weâ??ll also cover **how to capitalise on this**, as well as **2 stocks that we think you may want to keep an eye out for buying opportunities**.

The webinar is completely **FREE** to attend, but youâ??ll need to **RSVP and reserve your slot here.**

Note: This is NOT a current affairs programme (lol) so if youâ??re completely clueless, please try to read up a little about the ongoing trade war prior to the webinar! You can reference Wikipedia here or check out this really cool summary I like from the Financial Times.

Agenda Summary:

â?? Implications of the US-China trade war
â?? What might happen if history repeats itself
â?? What this means for your portfolio
â?? Strategies to adopt to â??weatherproofâ?• your investments
â?? How to capitalise on this
â?? Case studies
â?? 2 stocks to keep an eye on for buying opportunities
